

Connecticut Antique Machinery Museum Association

Fall Festival SAFETY Regulations

*****SITE-WIDE SPEED LIMIT = NO FASTER THAN A WALK *****

- **Parking:** There will be no parking on the entrance road or blocking any other roads, loading ramps, doors or the like. Your registration gives us permission to tow vehicles in violation.
- **Tractors and moving equipment may have no more riders than they were designed for.**
- Keep a flag man in front of moving tractors and poor visibility equipment.
- Towed machinery must be properly attached when in motion.

Fire Safety

- You are responsible for locating the **nearest extinguisher station** to your site.
- **Fire extinguisher stations** are provided as a benefit to exhibitors. Please respect this and leave them untouched unless needed.
- Shut off engines while refueling.
- No open **fuel containers** or leaky fuel systems. Gasoline vapors are dense and stay near the ground. Alert others to gas spills.
- **No smoking** near open gas containers or while fueling.
- **No unattended running engines.**
- **Police** your site before you leave.
- **Campfires:** No flammables next to fires. Use a fire ring or stone barrier around campfires. Clear a 5 foot no-burn zone around campfires. Be sure there are no low hanging tree branches over the fire area. Make sure to have access to a fire extinguisher or a bucket of water and a shovel for emergencies. Never leave a campfire unattended. Police the area before you leave.

Machinery/Engine Safety

- Only **qualified** operators may operate exhibits.
- Know your machinery. Don't operate a vehicle/machine unless you are fully familiar with its operation.
- **Steam:** Boilers must be state inspected if fire box is over one cubic foot. Steam hookups are available behind the Industrial Hall. House steam pressure varies from 40-80 psi. Open valves slowly. Treat steam with respect - burns are painful.
- All **electrical** equipment must be properly sized and in excellent condition.
- Maintain public safety zones. Keep the public at least 4 feet from operating equipment. **KEEP ROPES UP!**
- Any exhibit/demonstration device, item, or equipment in support of an exhibit that is in an unsafe condition must be corrected, terminated or removed from the show site.
- Dangling, loose clothing, jewelry, hair or loose shoelaces must be corrected before operating machinery.

Phones are available in all major buildings. Dial 911 for fire or medical emergencies. We are located at 31 Kent-Cornwall Rd. in Kent, CT. Immediately alert CAMA personnel to any emergencies or injuries.

CONTINUED ON OTHER SIDE OF THIS PAGE.

IMPORTANT REGULATIONS

CAMA is not childproof. There will be operating machinery exhibits as well as trucks and tractors driving to exhibits spaces along driveways/walking paths. Please closely supervise all children in your care both inside and outside of buildings **HOLD THEIR HANDS!**

MOVEMENT OF TRACTORS: All types of tractors, including garden tractors, are to be driven in and during the tractor parade ONLY. No one is to ride on tractors during other hours except to move them to an exhibit space. Any driver under the age of 16 must have an adult accompanying them during the parade. The parade moves slowly enough that an adult will be able to walk alongside.

ALL TERRAIN VEHICLES, INCLUDING DIRT BIKES: (Definition contained here)

These types of motorized vehicles are not to be used on any part of our grounds at any time. This is not limited to our show but is in effect year round, 24/7. CAMA is situated on Connecticut state land (*we own the buildings and equipment but lease the land from the state*). As per state law, no one may operate an “ATV” on state land unless the land is designated for such use. CAMA’S land is not. The state’s definition of an “ATV” in this context is “*any motorized vehicle not suitable for operation on a highway... and travels on two or more tires*.” CAMA will not allow any such ATV that is brought onto our grounds to be unloaded.

EXCEPTIONS to these regulations: Authorized CAMA working staff members will be allowed to use golf carts and gators for transportation throughout the grounds. In addition, the handicapped and physically challenged will, of course continue to be allowed to use motorized equipment.

CAMPERS: We must know who is camping on our ground. Consequently, we’ll be asking all campers to register with CAMA (*no fee involved*). There will be information about this when you arrive for the show. In the lower parking field, all camp sites must be along the river side of the field.

ANTIQUÉ CARS AND TRUCKS: We enjoy having these vehicles as part of our show, but due to space limitations we will only allow Pre-1933 vehicles in the upper field. All other classic and antique vehicles will need to park in the lower field in a section for antique vehicles.

VENDORS: We will be adhering to this vendor registration/space assignment schedule strictly this year in an effort to be fair to all.

Those of you who Pre-Registered for this year’s show must still wait until **noon Wednesday the 22nd** to check in and register at the registration tent and then you will be allowed to set up in your chosen spots.

Vendors who did not pre-register will be asked to wait until **noon Wednesday** to register and be assigned a space on a first come basis. **No exceptions!**

Once registered, a CAMA member will then direct you to an appropriate vendor space(s). Be aware that if you put something in a space before registering, it could be removed or we may ask you to remove it. Once you’ve registered as a vendor and have been assigned a space(s) you must leave something in your chosen space(s) - (tent, tables, etc.)
